

Albion Engineering Company Handbook & Catalog

Providing You with
Tools & Technical Information to Solve
Your Application Needs

How Fast is Fast! this Cordless Gun can dramatically decrease the amount of time on a work site. For example filling a 1/4 inch x 1/8 inch joint the length of a football field can be done in less than 2 minutes. That's equivalent to 202 feet per minute.

.....

$$F \text{ (force)} = P \text{ (pressure)} \times A \text{ (area)}$$

Engineered Dispensing Solutions. Albion

Engineering is a third-generation company

internationally recognized

as a leader in the field

of hand held dispensing

technologies.

Albion supports

multiple industries

with innovative,

high quality dispensing

tools and accessories

for the most demand-

ing applications. Please visit our web site and/or

request a catalog.

MULTI-COMPONENT

ACCESSORIES

INTRODUCTION

I am proud to present to you our catalog and hope you will find it useful and educational. The catalog is divided into 3 major sections.

Background Information— detailing how a tool can be built, the benefits in each segment of the tool and how to select the right tool for your application.

Core Product Selection— sorted by how the material is packaged - bulk, sausage, or cartridge - we provide you with the “Core” tools for each section first and then variations of the core tools, allowing you to select the right tool for your specific needs and application.

Nozzles and Accessories— key components in the application process.

Incorporated within the catalog are “Albion Engineering Tidbits” which are designed to help you understand key elements behind the tools you are selecting and how they are used to improve your application needs.

Albion Engineering Company has served your dispensing needs for over 80 years. I am proud to be the third generation of Schneiders, and I hope our products meet your expectations.

Thank you.

HOW A DISPENSING TOOL WORKS

How a Dispensing Tool Works— Building a Tool

There are 3 core components in a dispensing tool: **Nozzle**, **Material Containment Unit**, and **Drive**. By customizing these components to meet your specific application needs, you can create the best dispensing tool.

Drive:
Creates initial
force or thrust

Material Containment:
Holds the bulk, sausage or
cartridge material

Nozzle:
Reduces material to
desired width

Drive— mechanism that creates force or thrust. There are three primary types available:

- **Manual Drive:** hand operated, portable, and efficient. Drives are available in a range of ratios depending on the viscosity of the material to be dispensed
- **Air-Powered Drive:** requires an air compressor, regulator, and hose. This setup is best for industrial applications
- **Cordless Drive:** portable, powerful, quick, and effortless

Material Containment Unit (MCU)— contains the material to be dispensed.

- Bulk Material: generally in pails
- Sausage Material: packaged in a Mylar sleeve which fits a standard tool
- Cartridge Material: portable, convenient

Nozzle— determines the size and shape of the material to be dispensed

Albion ENGINEERING Tidbit™

FORCE (thrust) from Drive → PRESSURE in Barrel → FLOW

The FORCE (thrust) from the drive creates PRESSURE on the material in the barrel; the piston inside the barrel moves the material. So, as the barrel diameter and piston increase in size, the internal pressure on the material naturally decreases (a drop in PSI).

NOZZLES

Nozzles:

Nozzles determine the size and shape of the material dispensed. The difficulty of pushing material through the nozzle will depend on its length and diameter.

Albion ENGINEERING Tidbit™

Nozzle Diameter Affects Pressure:

As the diameter of the nozzle decreases and its length increases, more pressure is required inside of the material containment unit to dispense the material.

If your application requires a long or thin nozzle, choose a higher thrust drive.

Albion ENGINEERING Tidbit™

Teflon® Facts and Trivia:¹

* PTFE is inert to virtually all chemicals and considered the most slippery material in existence. As a DuPont registered trademark, **Teflon®** has become a familiar household name, recognized worldwide for the superior non-stick properties associated with its use as a coating on cookware and as a soil and stain repellent for fabric and textile products.

* **Teflon®** has been involved in the U.S. space program since the program's infancy. When Neil Armstrong took his historic "giant leap for mankind" in 1969, the moon module included numerous applications involving **Teflon®** resin, including space suits, blankets, heat shields, insulation, and cargo hold liners.

* As a liquid, **Teflon®** repels water and stains for apparel, home fashions, furniture, and uniform markets. **Teflon®** forms a molecular shield around each fiber, guarding them from oil and water-based stains, dust, and soil. ...without affecting their color, feel, or breathability.

* **Teflon®** is in the Statue of Liberty in New York harbor as an insulator and lubricator between the copper skin and the stainless steel skeleton.

* **Teflon®** in a composite sheet form with graphite is used for bearing pads in the George Washington Bridge in New York State to prevent corrosion of the steel plates.

* **Teflon®** is the slipperiest solid substance on Earth with the low static coefficient of friction of 0.04 (**Teflon®** on **Teflon®**).

* Albion is the only Caulking gun company to use Teflon® as a barrel coating material inside and out to make dispensing and cleanup easier.

¹The History of **Teflon®** by DuPont.

The Dupont website: [http://www.DuPont tetrafluoroethylene \(PTFE\)](http://www.DuPont tetrafluoroethylene (PTFE))

BARRELS

Material Containment Units:

Material Containment Units contain the material to be dispensed. The force generated by the Drive System creates pressure inside the Material Containment Unit, forcing the material through the nozzle.

The following are the most common containers for materials:

Throughout the catalog you will see the force generated by the drive system in maximum pounds force (lb_f) and the resulting maximum pressure generated inside the material containment unit in maximum pounds per square inch (psi) pressure associated with each tool.

- **Bulk**— the most cost effective material packaging, generally in 2 or 5 gallon pails that require self loading dispensing tools. Bulk dispensing guns are available in 3 different barrel diameters and in various lengths. Bulk tools come with dual leather pistons that push a multitude of material types.

- **Sausage**— more cost-effective than cartridges. Less waste than cartridges. Sausage and Bulk dispensing tools are quite similar, except in the Sausage dispensing tool the plastic piston replaces the leather pistons to maximize efficiency. Albion highly recommends a solid **Teflon**[®] piston to minimize friction between the piston and the barrel, as well as maintaining the required thrust to dispense materials.

- **Cartridge**— cleanest and easiest packaging to dispense material, but the highest in cost per ounce. Single and two component cartridge designs vary significantly in quality and acceptable maximum pressure.

Bulk and Sausage Dispensing Tool Barrels:

Steel— the standard for many years; durable, reliable, and can be cleaned using a barrel brush (800-G01)

Aluminum— light weight; not as durable as a steel barrel, so care is required with this tool.

Teflon[®]-Coated Steel— a standard steel barrel coated with DuPont's **Teflon[®]**, the slipperiest substance known to man.¹ It's non-stick surface improves clean-up. **Teflon[®]** eases the dispensing tool process and substantially reduces the friction between the piston and barrel when coupled with **Teflon[®]** pistons, thus requiring less thrust to dispense material.

¹ **Teflon[®]** is a registered trademark of DuPont[™] used under license by Albion Engineering Company.

DRIVES

Drive Systems:

Professional Line: We are especially proud of our Professional Line, which satisfies the needs of skilled craftsmen installing sealants and adhesives on a daily basis. These individuals require heavy-duty tools that are adaptable for special applications and are easily maintained with replacement parts. They expect their tools to perform day-in, day-out and to endure harsh chemicals. These tools must operate reliably over a wide range of temperatures and the unforgiving environment of construction job sites. The Professional Line is our long-developed solution for this demanding group. Drives in this category are Special Deluxe (most popular), Special Deluxe Plus, Ultra, Deluxe, Utility, Utility Plus, Air, Cordless and Push-Pull.

B-Line: Albion designed this line to compete with the best from around the world. By combining Albion state-of-the-art design and quality we offer tools that surpass the competition. Drives in this category are B1, B12, B18 and B26.

Viper Line: Basic guns designed for simple jobs. Typically offered at hardware, paint and DIY stores. We add to their value with our engineering and quality control. Drives in this category are R5, R6B & H10.

FACT: Caulking Gun Drives are Just Like the Gears of a Racing Bike:

Just as you would never choose the same bicycle gear for a level road as you would a steep hill, choose the correct caulking gun drive based on the thickness of the material you are dispensing and the length of the nozzle.

When you need to climb a steep hill on a bicycle you are thankful to have low output (high-thrust) gears. Think of dispensing a high viscosity product, like cold urethane or two-part epoxy, like a big hill to be climbed. Your speed in the low gear is decreased, but you can still handle the higher work load comfortably. Long nozzles (over 6") present a similar challenge. You need to gear-down to handle the work load.

When you are cycling a flat stretch of road (analogous to a dispensing a lower viscosity caulk like silicone or acrylic latex), you will be frustrated with that low gear - you are spinning your cranks (pulling the trigger) too easily and your output is low. You need to switch back to a higher gear (lower thrust gun drive) for higher output.

So choose your dispensing tool power based on the material and application - the same way you would choose the gear on your bike based on the terrain.

DRIVES

Relationships Between Drive Systems, Force (thrust), and Pressures (PSI) within the Material Containment Unit (MCU). Below is a standard “engineering” equation which shows the relationship between the Force generated (required) by the drive system and the pressure within the MCU. Note the decrease in pressure as the barrel diameter increases.

$$F \text{ (force)} = P \text{ (pressure)} \times A \text{ (area)}$$

(force):
generated by Drive

(pressure): in
Material Containment Unit

(area):
surface area of piston

DRIVES

Albion Professional Line

Special Deluxe Line of Manual Drives

Special Deluxe Manual Drive

Special Deluxe Plus Manual Drive

Ultra Manual Drive

Special Deluxe:

- ✓ 375 lb force
- ✓ generally used by waterproofers & glaziers

Special Deluxe Plus:

- ✓ 700 lb force

Ultra Manual Drive:

- ✓ 2 speeds: 1100 lb force and 375 lb force

Special Deluxe, Special Deluxe Plus, and Ultra Manual Drives—

Models are built for daily heavy-duty use and offer the best combination of price and performance.

Standard Drive features: • reinforced construction for high-pressure applications • welded heavy gauge steel • Albion quality • epoxy-coated handles for comfort and corrosion resistance • T-pulls with 5/16"

Special Deluxe Manual Drive:

- 375 lb force

square smooth rod

Special Deluxe Plus Manual Drive:

- 700 lb force
- double the power of a Special Deluxe Drive

Ultra Manual Drive:

- 1100 lb force
- nearly 4 times the power of a Special Deluxe Drive

Albion Professional Line

Deluxe Manual Drives

Deluxe Manual Drive

Models are built for moderate daily use and offer a good combination of price and performance.

- ✓ 375 lb force
- ✓ 1/4" square smooth piston rod that rotates for 4 times longer life
- ✓ thumb activated instant pressure release
- ✓ formed steel construction and corrosion resistant zinc plating with solvent resistant leather piston
- ✓ the roofers' and framers' tool

Deluxe Manual Drive:

- 375 lb force

DRIVES

Albion Professional Line

Utility Manual Drives

Utility
Manual Drive

Utility Plus
Manual Drive

Utility Manual Drive:

- ✓ 350 lb force
- ✓ the adhesive tool

Utility Plus Manual Drive:

- ✓ 600 lb force, almost twice the thrust of the Utility Drive with minimal added cost

Utility and Utility Plus Manual Drives—

Models for lighter duty use.

Standard Drive features:

- 5/16" round smooth rod
- heavy gauge steel and zinc plating
- fast acting 3-prong clip on cap
- durable coil springs
- Albion quality
- built for moderate use
- more durable than the average professional tool

Utility Manual Drive:

- 350 lb force

Utility Plus Manual Drive:

- 600 lb force
- double the power of a Utility Drive

Albion Professional Line

Push Pull

Push Pull
Manual Drive

- ✓ a dispensing tool without a drive
- ✓ manual load and unload; pull back to load, push to dispense
- ✓ a lower cost alternative for quickly dispensing low viscosity fluids or priming equipment
- ✓ excellent for large volume applications where control is not an issue
- ✓ uses the same durable replaceable components as a Special Deluxe Tool

Albion ENGINEERING Tidbit™

Single Action Air Guns—

- Air power allows for smooth dispensing
- Manual load improves speed and quality
- Its simplicity improves reliability
- Air pressure = material containment pressure

Dual Action Air Guns—

- Air power in both dispensing and loading directions
- Commonly used on two component applications
- Best for experienced users

DRIVES

B-Line

Manual Drives

B1 Manual Drive

B12 Manual Drive

B18 Manual Drive

B26 Manual Drive

B1 Manual Drive:

- ✓1/10 gallon cartridge
- ✓excellent value
- ✓light, flexible, easy to operate
- ✓high output for low viscosity materials
- ✓smooth, consistent, **drip free** application
- ✓orange powder coated
- ✓stores flat in a tool box, out of the way

B12 Manual Drive:

- ✓12:1 Drive (Standard power ratio)
- ✓Albion's Double-Gripping Plate technology for double the life of the tool
- ✓Albion's adjustable wear compensation device for no-loss trigger motion
- ✓smooth action and comfortable grip
- ✓slotted front cap for easy loading
- ✓equipped with ladder hook pull and cartridge puncture wire

B18 Manual Drive:

- ✓18:1 drive for medium viscosity materials
- ✓all the features of a B12

B26 Manual Drive:

- ✓26:1 Drive
- ✓all features of the B12
- ✓high-performance applicator
- ✓easily handles high-viscosity materials and use in cold weather

B1 Manual Drive:

- 200 lb force
- handymans tool

B12 Manual Drive:

- 375 lb force
- all around tool

B18 Manual Drive:

- 700 lb force
- more power

B26 Manual Drive:

- 900 lb force
- high thrust for thick materials

Albion ENGINEERING Tidbit™

Why Ratchet and Smooth Rod Caulking Guns:

* Ratchet Rod tools were the first tools built to dispense caulk. They were, and still are, great tools for dispensing low viscosity (watery) materials and when multiple short applications are used.

* In 1933 Albion invented and patented the Smooth Rod Caulking Gun—enabling the caulker to do long applications with little or no imperfections. In other words, a Smooth Rod Caulking Gun provides a smoother bead of caulk.

* Some Smooth Rod Caulking Guns have been designed so that they don't drip after dispensing. What the designers have really done is create a Smooth Rod caulking Gun that acts like a ratchet gun— an evolution toward the past... .

DRIVES

Viper Line

Manual Drives

H10
Manual Drive

R5
Manual Drive

H10, R5, and R6 Manual Drives—

• Basic guns designed for simple jobs. Typically offered at hardware, paint and DIY stores. We add to their value with our engineering and quality control. Drives in this category are R5, R6B & H10.

H10 Manual Drive:

- ✓ 10:1 power ratio
- ✓ smooth hex rod
- ✓ nozzle cutter and puncture wire
- ✓ easy, out-of-the-way storage with its light, flat design

R6
Manual Drive

R5 and R6 Manual Drives—

• Excellent for low cost sealants and applications where there is a significant amount of start and stops, due to the inherent drip-free design of a ratchet drive. Nozzle cutter and puncture wire.

R5 Manual Drive:

- ✓ 5:1 power ratio
- ✓ disposable, low usage tool

R6 Manual Drive:

- ✓ 6:1 power ratio

Albion Professional Line

Air-Powered Drives

Single Action
Air Drive Drive

Dual Action
Air-Powered Drive

AT Dual
Action Drive

Single Action and Dual Action Air-Powered Drives—

Unlike a Manual tool, an air-powered gun has a few unique qualities.

- to regulate the flow of material, simply adjust the air pressure regulator
- manual force is not required to create pressure within the MCU
- the thickness of the material and the pressure supplied determine the speed of material dispensing

Single Action Air-Powered Drive:

- ✓ air power allows for smooth dispensing
- ✓ manual loading improves speed and quality
- ✓ its simplicity improves reliability

Dual Action Air-Powered Drive:

- ✓ air power in both dispensing and loading directions

AT Dual Action Air-Powered Drive:

- ✓ large 4" air cylinder for fast dispensing of twin cartridge material
- ✓ ergonomic suitcase handle

BATTERY POWERED DISPENSING TOOLS

18V Heavy Duty Cordless Guns with State-of-the-art Performance, Portability, and Control

• **Fully Assembled**— ready to go right out of the box

• **Heavy Duty**— all-metal gear box develops 950 lbs force, three times the power of most manual guns; composite carriage strongest in the industry

• **Total Dispensing Control**— set maximum speed rate and fine tune with variable speed trigger

• **High Productivity**— as incredible as this seems, a joint 1/4" x 1/8" and the length of a football field can be filled in less than 2 minutes; with a rod speed of 23 inches per minute, jobs get done faster

• **Power Efficient**— dispense over 185 latex 10 oz cartridges or over 60 cold urethane 10 oz cartridges on one charge (compact battery)

• **Ergonomic**— design greatly reduces trigger-hand fatigue and wrist strain

• **No Drip**— instant drive disengagement

• **18 Volt Battery**— Lithium-ion performs at full power until drained; included with 30 minute fast charger

• **Easy Conversion**— kits available for easy conversion to cartridge, bulk, or sausage dispensing

• **Compatibility**— accepts all Albion air and manual accessories

12V Standard Duty Cordless Guns - The Convenience of Cordless Battery Power with No Loss in Speed

• **Powerful**— 400 lbs of dispensing force

• **Fast**— dispense a 10 oz cartridge in 16 seconds

• **Lightweight**— 30% lighter than our 18V models

• **Long Lasting**—

12V Lithium-ion battery can dispense 100+ 10oz cartridges

• **Control**— variable speed trigger with max speed dial and no drip

photo provided by:
United Professional Caulking & Restoration, Inc.

How Fast is Fast! A Cordless Gun can dramatically decrease the amount of time on a work site. For example a DL-59-T13E with a 2" barrel can fill a 1/4 inch x 1/8 inch joint the length of a football field in less than 2 minutes.

That's greater than 150 feet per minute. And unlike an air-powered tool, there are no hoses to get in the way. Albion's Cordless guns are the only tools that can consistently perform to such high standards for extended periods of time. Below is a Standard Usage Chart contractors refer to when estimating the amount of material needed for a specific job. By knowing the width and depth of a joint, a contractor can then calculate the number of feet possible from a single gallon of material. The next chart, "How Fast is Fast", shows how many feet of material can be applied per minute using an Albion battery powered tool.

standard material usage chart	depth of joint	Usage Chart for Standard Sealant based on one gallon:							
		← width of joint →							
		1/4"	1/2"	3/4"	1"	1 1/4"	1 1/2"	1 3/4"	2"
1/8"	616 ft								
1/4"		154 ft							
3/8"			68 ft						
1/2"				39 ft	31 ft	26 ft	22 ft	19 ft	

How Fast is Fast?
 How about filling a joint the length of a football field in less than two minutes! See the chart below.

speed	model	Installation Speeds with a Cordless Drive:							
		← width of joint →							
		1/4"	1/2"	3/4"	1"	1 1/4"	1 1/2"	1 3/4"	2"
DL-59-T13E 2" Barrel Diameter	193 ft per minute	48 ft per minute	21 ft per minute	12 ft per minute	10 ft per minute	8 ft per minute	7 ft per minute	6 ft per minute

Albion ENGINEERING Tidbit™

Dramatically Increase Your Productivity with the DDT Delamination Detection Tool:

Albion's Delamination Detection Tool, the DDT (p/n 875-1), improves the process of detecting voids with hammers or chains by about 500%. The DDT is safe to use, helps avoid repetitive motion injuries, reduces wrist strain, and prevents ladder accidents.

Conveniently, it adapts to most medium and heavy duty broom sticks and paint poles (available upon request) and accepts standard 3/4" crayon and paint markers for on-the-spot marking of delaminated areas. The surfaces it can be used on include concrete slabs, columns, walls, beams, tile surfaces, and masonry. The DDT is ideal for inspecting wide ranges of surfaces like parking garages, bridge decks, support structures, balconies, and tunnels. For more information visit www.ddt-tool.com.

Albion ENGINEERING Tidbit™

Standard Leather Piston Packing Replacements—

All Bulk models come equipped with the standard Soft Leather Cup.

- Recommended for general purpose applications and to improve dispensing performance.
- Flexible, long-lasting, and durable— easily handles harsh abrasives and solvents.
- Best all-around chemical resistance.

To customize your tools for specific types of adhesives and sealants see SYNTHETIC UPGRADES. (page 79 for more details.)

Required Maintenance: Leathers must be soaked in light weight oil between cleanings to retain their sealing properties.

Albion ENGINEERING Tidbit™

Albion offers two battery-powered cordless drives: 12Volt and 18Volt.

Both are powered by lightweight, long-lasting, fast-recharging Lithium Ion batteries

The rod speed (not under load) for both models is 21 to 23 inches per minute

- Heavy Duty drive pushes with 950 lbs. of force
- Over 80 gun models for Bulk, Sausage, Cartridge and Multi-Component dispensing
- Best for thick materials & twin-cartridges

- Standard Duty drive pushes with 400 lbs. of force
- 3 gun models for 20oz Sausages, 10oz Cartridges & Quart Cartridges

- 30% lighter than comparable 18V models
- Best for standard materials like acrylic, silicone & urethane.

Albion ENGINEERING Tidbit™

Can you dispense grout or mortar with an Albion gun?

Yes, all Albion bulk guns can dispense grout or mortar. Our models DL-45-T13 (manual) DL-45-T13A (pneumatic) or DL-45-T13E (cordless battery) are the most popular for this application, but larger (up to 80oz) and smaller (as little as 10oz) guns work equally well. The standard 1/2" round metal nozzle #32-55 allows for efficient placement of mortar between stone or brick and clean up with water is minimal. For special situations substitute smaller nozzles (down to 1/8") or larger (up to 3/4"). For grouting between tiles consider one of our metal slot nozzles. Or, substitute our #235-3 tapered plastic cone nozzle and trim the opening to any size from 1/8" to 1-3/4".

To load the gun, remove the front cap, pull the rod completely back and load the barrel of the gun by troweling in your mix. Some polymer modified products can be loaded by sucking them up into the barrel, the same method used with caulks.

Tap the side of the barrel frequently during loading cementitious products to remove voids. When using a cement-based mortar or grout you may need to modify your mix. A wetter mix flows better, but too wet and you can get separation of the water and aggregate inside the barrel. The addition of a latex masonry additive (AKA milk) will also make dispensing easier and help keep the mix together. If you are doing a large quantity of pointing with water based products and the leather pistons require frequent maintenance consider replacing the front cup with a #21-16 Nitrile Rubber piston. There is more information on grouting on our web site www.albioneng.com in the **Product Resources** section under **Frequently Asked Questions**.

DL-45-T34E	Cordless Gun	950 lb _f	300 psi

SAUSAGE

Polyfinger

Hytrel

20oz Piston Variations

Polyfinger or Hytrel. (see page 79 for piston information.)

Polyfinger Piston: • low cost piston option (p/n 47-39) (10 pack)

- (3) 235-3 Orange cones instead of the standard 1/2 inch round nozzle

Steel Barrel

DL-45-T15	Special Deluxe Manual Gun	375 lb _f	120 psi
DL-45-T15A	Air-Powered (previously 100-13)	* →	120 psi

Hytrel Piston: • stiff piston with sharp edges to prevent bag wrap (p/n 21-24)

Steel Barrel

DL-45-T18	Special Deluxe Manual Gun	375 lb _f	120 psi
DL-45-T18A	Air-Powered Gun	* →	120 psi

440 Series guns are special kits. All bulk versions have 222-2 expanders in the leather pistons and a 416-G01 hook pull. Most have both 235-3 cone nozzles (w/421-G01 cap) and a 33-55 metal nozzle (w/426-G01 cap). See notes for exceptions. Sold only through distributors. Minimum order quantity is 96 guns.

Albion ENGINEERING Tidbit™

LADDER HOOK PULLS—

Albion Bulk, Sausage, and Cartridge guns accept Ladder Hook Pulls that conveniently hang for ready use. Simply screw on to the piston rod of any Albion model.

Aluminum: 310-1

Steel: 416-G01

Steel: 310-2

B26	Manual Gun (26:1 Drive) High Thrust	900 lb _f	300 psi

Albion ENGINEERING Tidbit™

Why Ratchet and Smooth Rod Caulking Guns:

* Ratchet Rod tools were the first tools built to dispense caulk. They were, and still are, great tools for dispensing low viscosity (watery) materials and when multiple short applications are used.

* In 1933 Albion invented and patented the Smooth Rod Caulking Gun— enabling the caulker to do long applications with little or no imperfections. In other words, a Smooth Rod Caulking Gun provides a smoother bead of caulk.

* Some Smooth Rod Caulking Guns have been designed so that they don't drip after dispensing. What the designers have really done is create a Smooth Rod caulking Gun that acts like a ratchet gun— an evolution toward the past... .

(fits DL-59-T13 [Manual], T13 [Air], and T13E [Cordless] tools)

MULTI-COMPONENT GUNS

Technical Reference Information

Review “how to build a gun” (page 5) with an emphasis on the high powered drives. The break down is the same for two component tools — nozzle, MCU, and drive.

Nozzle: The nozzle actually mixes the two materials together; therefore, the material containment unit requires more pressure to generate the flow out of the nozzle. Generally speaking, more elements in a mixer or smaller size increases pressure. (The material manufacturer carefully selects and specifies the nozzle required for their material to obtain a proper mix. Variation from that specification is not recommended.)

Material Containment Unit: The material manufacturer selects the specific cartridges which properly fit their material and the application. Be aware that:

- The face of cartridges and their size determine the proper tool category.
- Larger size cartridges are more economical, but they make the gun system heavier and the material exponentially harder to dispense.

(Force=Pressure X Area)

Drive: The increased number of variables makes selecting a drive system far more critical. Be aware that:

- Thick material requires a high thrust drive system. Manual tools need more pumps for the material to flow.
- Air guns require a larger air cylinder to generate the dispensing force and flow rate.
- Cordless tools must be carefully matched up with the application.

Throughout the catalog the force and material containment unit pressures are listed with each tool. In this section it is important to compare tools and the pressures they generate.

For example: Material packaged in 300x300ml and 750x750ml cartridges, which to select? The pressure required in the MCU to dispense the material is the same. Then:

750x750 ml System requires a 778-1U gun which can generate 81 psi

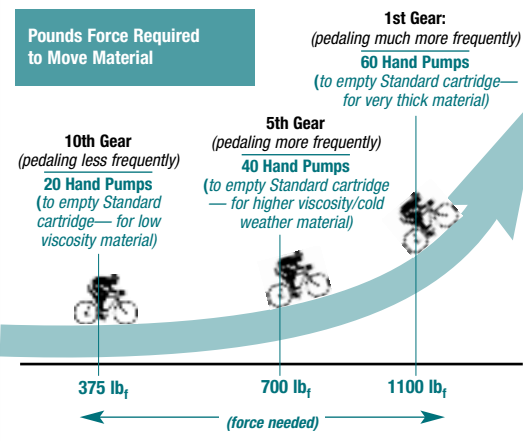

300x300 ml System requires a 505-9U gun which can generate 205psi

The best system changes in relation to the viscosity:

Thick — the 300x300ml System

Thin — the 750x750ml System

FACT: Caulking Gun Drives are Just Like the Gears of a Racing Bike:

MULTI-COMPONENT

MULTI-COMPONENT GUNS

Bayonet Style Cartridge Specifications

Unique characteristics of the cartridges in this category:

- Designed to easily slide into a dispensing tool and to be held rigidly
- Sturdy one piece design with solid multi-seal pistons.(50cc)
- Static mixers specific to cartridge style and material are required to ensure proper mix

50ml Cartridges: Compact package (cartridge length $4\frac{27}{32}$ inches); tools are generally small and compact; most popular tools are the Composite Gun (871-1) and the R-Line Gun (R6T50i)

Note: the view below is an example, but not exclusively a representation of the cartridge face

Cartridge Ratio:	1:1	2:1	4:1	10:1
Outside Diameters (in.):	$\frac{27}{32} \times \frac{27}{32}$	$\frac{31}{32} \times \frac{23}{32}$	$\frac{31}{32} \times \frac{1}{2}$	$\frac{31}{32} \times \frac{11}{32}$

180ml (6oz), 240ml (8oz), and 360ml (12oz) Cartridges: Unique application cartridges similar to the 50cc cartridges; known cartridges are all 1:1 ratio, $1\frac{1}{4}$ inches in diameter

Note: the view below is an example, but not exclusively a representation of the cartridge face

Cartridge Volume:	180ml/6oz	240ml/8oz	360ml/20oz
Outside Lengths (in.):	$6\frac{1}{2}$	$8\frac{15}{16}$	$10\frac{1}{4}$

Static Mixers (see page 64): Static mixers are designed specifically to materials packaged in the cartridges; in order to ensure you select the

correct static mixer for your application you will need to contact either the material manufacturer or Albion by phone or e-mail

When choosing the correct static mixer for a specific application there are many variables to take into consideration: material being dispensed, volume of material per application, and how well the two materials mix with each other; in addition, Static mixers are available in round or square configurations, diameters, lengths, and varying elements

Albion ENGINEERING Tidbit™

Adjustment Screws Mean Longer Tool Life:

B Line Tools are engineered to a higher level; for example, Albion's adjustment tool technology means increased life of the gun—as the tool wears you can adjust the screw to remove the wasted motion

adjustment screw

Albion ENGINEERING Tidbit™

Dramatically Increase Your Productivity with the DDT Delamination Detection Tool:

Albion's Delamination Detection Tool, the DDT (p/n 875-1), improves the process of detecting voids with hammers or chains by about 500%; the DDT is safe to use, helps avoid repetitive motion injuries, reduces wrist strain, and prevents ladder accidents; conveniently, it adapts to most medium and heavy duty broom sticks and paint poles (available upon request) and accepts standard 3/4" crayon and paint markers for on-the-spot marking of delaminated areas; the surfaces it can be used on include concrete slabs, columns, walls, beams, tile surfaces, and masonry; the DDT is ideal for inspecting wide ranges of surfaces like parking garages, bridge decks, support structures, balconies, and tunnels; for more information visit www.ddt-tool.com

Albion ENGINEERING Tidbit™

A Variable Speed Trigger Offers Additional Fine Tuning Control—

Albion's unique Variable Speed Trigger means complete control during an application; by fine tuning the rate of an application there's truly complete control in creating smooth beads, blending, and ease in applying material around corners

variable speed trigger

MULTI-COMPONENT

MULTI-COMPONENT GUNS

200 and 400 Series Cartridge Specifications

200 Series (6.5oz) Cartridges: Compact package designed to contain a combined total of 200ml, or 6.5 ounces, of material; the total cartridge length is $5\frac{13}{16}$ inches; the cartridge piston design allows most tools to handle at least two different ratios with no adjustments required; (Most common tool used— B26T200)

Note: the 3/4 view below is an example, but not exclusively a representation of the cartridge face

Cartridge Ratio:	1:1	2:1	4:1	10:1
Volume:	100x100	100x50	100x25	100x10
Outside Diameters:	$1\frac{15}{32} \times 1\frac{15}{32}$	$1\frac{23}{32} \times 1\frac{7}{32}$	$1\frac{15}{16} \times 3\frac{1}{32}$	$2\frac{5}{32} \times 2\frac{3}{32}$

400 Series (13.5oz) Cartridges: Compact package designed to contain a combined total of 400ml, or 13.5 ounces, of material; the total cartridge length is $7\frac{3}{4}$ inches; the cartridge piston design allows most tools to handle at least two different ratios with no adjustments required (Most common tool used— B26T400)

Note: the view below is an example, but not exclusively a representation of the cartridge face

Cartridge Ratio:	1:1	2:1	4:1	10:1
Volume (ml):	200x200	200x100	200x50	200x20
Outside Diameters (in.):	$1\frac{3}{4} \times 1\frac{3}{4}$	$1\frac{1}{16} \times 1\frac{15}{32}$	$1\frac{9}{32} \times 1\frac{15}{32}$	$2\frac{21}{32} \times 2\frac{27}{32}$

MULTI-COMPONENT

Albion ENGINEERING Tidbit™

AT Guns—

The AT line of twin cartridge air guns was developed to address two major short-comings in the marketplace. Ergonomics: New suitcase handle makes one or two hand operation possible with easier and more comfortable dispensing. Quick Exhaust: the fastest in the industry means no material is wasted due to run-on.

Albion ENGINEERING Tidbit™

Dramatically Increase Your Productivity with the DDT Delamination Detection Tool:

Albion's Delamination Detection Tool, the DDT (p/n 875-1), improves the process of detecting voids with hammers or chains by about 500%; the DDT is safe to use, helps avoid repetitive motion injuries, reduces wrist strain, and prevents ladder accidents; conveniently; it adapts to most medium and heavy duty broom sticks and paint poles (available upon request) and accepts standard 3/4" crayon and paint markers for on-the-spot marking of delaminated areas; the surfaces it can be used on include concrete slabs, columns, walls, beams, tile surfaces, and masonry; the DDT is ideal for inspecting wide ranges of surfaces like parking garages, bridge decks, support structures, balconies, and tunnels; for more information visit www.ddt-tool.com

Albion ENGINEERING Tidbit™

Barrel Diameter Affects Pressure:

For example using a Bulk gun with a 25/8" diameter generates 700 lb force, however, if the diameter increases to 33/8" the force drops to 375 lb force; basically the initial force generat-

ed by the drive is spread out over a larger area (diameter) and so the pressure drops accordingly

Albion ENGINEERING Tidbit™

Rotating Rods: 4 Times the Life

Albion's square smooth drive rod rotates 4 times for longer life than a standard round tool rod

MULTI-COMPONENT

300ml MULTI-COMPONENT GUNS

300 Series and "Stubby" Cartridge Specifications

Unique characteristics of the cartridges in this category:

- Either a 2 Piece snap-together or a molded one piece cartridge.
- Outside diameters for the 1:1 are 1¹⁵/₃₂ x 1¹⁵/₃₂ inches; outside diameters for the 2:1 are 1¹⁵/₃₂ x 1¹/₁₆ inches
- Designed to easily slide into a dispensing tool and to be held rigidly.
- Multiple ratios fit one dispensing tool with no alterations to the tool.
- Require "bell" shape mixer with locking nut. (544-7)

300 Series Cartridges: Compact package designed to contain 10oz, or 300ml (150x150ml), of material or 7.5oz, or 225ml (150x75ml). Cartridge total length 8¹/₂ inches. Most common tool used is the B26T300.

"Stubby 150" Cartridges: Compact package designed to contain 5oz, or 150ml (75x75ml), of material. Similar cartridge design but generally a one piece molded design and shorter in length. Total length 4¹/₂ inches.

Albion ENGINEERING Tidbit™

Cordless Guns— State-of-the-Art Performance, Portability, and Control.

- **Heavy Duty**— all-metal gear box develops 620 lbs force; composite carriage strongest in the industry.
- **High Productivity**— max speed of 23 inches per minute gets the job done faster; double the power of most manual guns.
- **Ergonomic**— design greatly reduces trigger-hand fatigue and wrist strain.
- **Total Dispensing Control**— set speed rate and fine tune with variable speed trigger.
- **Power Efficient**— dispense over 185 latex 10 oz cartridges or over 60 cold urethane 10 oz cartridges on one charge.
- **Auto-reverse**— relieves pressure and reduces cartridge run-on.

The Professional's Preferred Choice

Ratio	Model	Description	Thrust	Pressure
-------	-------	-------------	--------	----------

Core Tools

These Albion guns are commonly used by the serious professional for two component applications

1:1	AT1200S	Suitcase Configuration <ul style="list-style-type: none"> • For 2-component 20oz sausage packs • Ergonomic Suitcase handle • Improved manifold and 4" air cylinder make for the fastest dispensing tool in its category • 150 psi max. 1 CFM • Includes 1/4" Quick Disconnect Style J or M 	1,884 lb _f	470 psi
-----	---------	--	-----------------------	---------

- Ergonomic design
- Faster flow increases productivity
- Responsive and easy reload
- Rugged construction

AT1200S Series Sausages: *Designed to reduce waste; fixed 1:1 material ratio; 2 inch diameter barrel; requires static mixer*

20oz/20oz Sausage Cartridges: *Unique characteristics of the sausages in this category:*

- Designed to reduce waste with a fixed 1:1 ratio.
- Sausage fits in a 2 inch diameter x 12.5 inch long barrel.

Final sausage shape after use.

1200ml MULTI-COMPONENT GUNS

20oz/20oz Sausage & Static Mixers

Static Mixers/Manifold:

- Designed specific to materials packaged in sausage packs

Pipe Style Static Mixers:

Designed exclusively for AT1200 Twin models. Disposable Plastic type: connects directly to the manifold outlet; it has a built in 3/4 inch NPT threaded coupling, eliminating the need for separate connecting nut

Reusable Stainless Steel model: includes three 8-element plastic mixer sticks

645-G05 Manifold for Twin Sausage Guns

- Machined from a single block of aluminum
- Provides optimum flow of material
- Includes two replaceable viton o-rings (192-6)

TWIN SAUSAGE VARIATIONS: Tools built for unique situations

GUN ACCESSORIES

STANDARD APPLICATIONS— Metal Caps & Nozzles

Standard Applications—Front Caps for Metal Nozzles

Standard Albion Metal Front Cap:

- Fits all “Albion” standard size Bulk and Sausage guns
- Standard 3/8” NPS Thread— accepts most standard metal nozzles

P/N:	Description:
26-6	2” Clip Cap
426-G01	2” Threaded
26-28	2” Threaded**
220-G01	2 5/8” Threaded***

Front Cap

426-G01

** Used with Cartridge Air Gun only *** 770 Series Guns

Metal Jumbo Cap:

- 7/8” -20 NEF Thread; used with Jumbo nozzles

P/N:	Description:
26-25-2	2” Clip Cap
426-G25	2” Threaded
220-G03	2 5/8” Threaded***
221-G01	3 3/8” Threaded****

Jumbo Cap

426-G25

*** 770 Guns ****103 and 200 Series Guns

Flat Caps: (p/n 421-G05)

- Used on full barrel cartridge guns to accept Albion metal nozzles
- Used with DL-24 or DL-810 series guns

421-G05

Standard Applications— Metal Nozzles

- Excellent wear resistance when working on masonry & other abrasive surfaces
- Fits Albion standard bulk/sausage front cap (p/n 426-G01)

Round Nozzles

32-22 32-46 32-49 32-33 32-47 32-37 32-88 32-48 32-55 32-77

Standard Round Nozzles: provide a round bead of sealant or adhesive; commonly used to fill joints or apply adhesive to surfaces

32-33

Style “A”:

One piece formed construction

P/N	Bead Diameter
32-22	1/8”
32-49	3/16”

32-88	3/8”
32-55	1/2”
32-77	5/8”
32-35****	3/4”

32-47

Style “B”:

Two or three piece construction

P/N	Bead Diameter
32-46	1/8”
32-47	1/4”
32-48	3/8”
32-37	3/32” Grouting

****Jumbo nozzle fits a jumbo front cap (P/N 426-G25)

GUN ACCESSORIES

STANDARD BULK/SAUSAGE & B-LINE— Plastic Nozzles

Overview: Plastic Nozzles

- Easily cut to size for the application with a utility knife
- Generally used for a few applications and discarded

Standard Applications—Front Caps for Plastic Nozzles

Ring Cap: (p/n 421-G01)

- Used with the (p/n 235-3 & 935-3) Cone Nozzles or (p/n 587-2) Cap Insert

P/N:	Description:
163-G02	2" Clip Cap Barrel
421-G01	2" Threaded Barrel
2-G16	2" Threaded Barrel**

** used with Cartridge Air Gun only

Plastic Nozzles—Albion Line

Albion Orange Cone Nozzle: (p/n 235-3)

- Fits all Albion standard Bulk/Sausage Guns with a ring cap (p/n 421-G01)
- 4.5" long

Bent Cone Nozzle: (p/n 935-3)

- 45 degree bend for better control
- Used with 421-G01 ring cap
- 6.5" long

Plastic Nozzles: B-Line

Standard B-Line Plastic Front Cap: (p/n 873-5)

- Fits B-Line Bulk and Sausage Guns
- Retains 873-2 Nozzle or 873-3 Black Cone Nozzle and 935-4

Front Cap

B-Line Clear Narrow Nozzle: (p/n 873-2)

- Fits B-Line Bulk/Sausage Guns with ring cap 873-5 to B-Line Bulk and Sausage Guns
- 4.5" long

B-Line Black Cone Nozzle: (p/n 873-3)

- Fits B-Line Bulk/sausage guns with a ring cap (p/n 873-5)
- Purchased in 10 unit packs
- 4.5" long

B-Line 45 Degree Bent Cone Nozzle: (p/n 935-4)

- 45 degree bend for better control & fits all B-Line Bulk/sausage guns with a ring cap (p/n 873-5)
- 6.5" long

Cap Adapters: (p/n 811-1)

- To adapt (p/n 873-5) black plastic B-Line cap to Albion standard 2 inch threaded steel or aluminum barrels

811-1

GUN ACCESSORIES

CARTRIDGE NOZZLES

Plastic Cartridge Nozzles

Angle Shot Green Plastic Nozzle: (p/n 935-1)

- Slips over 1/10 gallon standard cartridge nozzle
- 45 degree bend for better access
- 7" long

Narrow Nozzle: (p/n 769-4-RDA)

- Easily sized for the application & generally used for a few applications and discarded
- Fits Albion standard bulk/ sausage guns with a ring cap (P/N 421-G01) and Metal Ring Cap Insert (p/n 587-2)

Plastic Ribbon Bead Nozzle: (p/n 1018-G01)

- Ideal for dispensing air barrier sealants
- 1/8" X 2" to 4" adjustable width
- 45 degree bend for better access
- Works with cartridge, sausage and bulk guns

Industrial Plastic Nozzles:

- Fits industrial style "SEMCO" cartridge on pg. 76
- 1/4 NPS thread; standard Albion cap requires 27-2 Adapter

P/N:	Tip Diameter:	Tip Length:
383-410	1/32"	4"
383-252	1/16"	2"
383-420	1/16"	4"
383-430	3/32"	4"
383-540	1/8"	2 1/2"
383-640	1/8"	6"
383-1004	1/8"	10"

GUN ACCESSORIES

SPECIAL APPLICATIONS— Metal Nozzles

Metal Nozzles— Bendable

Aluminum Bending Nozzles:

- Allows you to reach difficult locations

P/N:	Bead Shape:
32-112	3/8" x 12" length
32-113	3/8" x 18" length
32-114	3/8" x 24" length

Optional: 966-2 with 32-112 nozzle

Required for B-line use

- Threaded base style bendable nozzles fit 426-G01 front cap
- To use with 421-G01 front cap add 966-1 adapter
- To use with B-Line front cap 873-5 add 966-2 adapter

P/N:	Bead Shape:
32-116	1/2" x 12" length
32-117	1/2" x 18" length
32-118	1/2" x 24" length

Required: 970-g02 with 32-112 nozzle

Required for Flared Nozzle

- Fits "Albion" standard bulk and sausage guns with 421-G01 front cap and 970-G01 adapter
- Fits 873-5 B-Line front cap with 970-G02 adapter

Metal Nozzle Extenders:

- For hard to reach applications
- Available in 3, 6, 12 & 18" increments

Note: the longer the nozzle the harder it will be to push material through the nozzle; consider upgrading to a high thrust gun

P/N:	Extension Length:
248-G03	3"
248-G06	6"
248-G12	12"
248-G18	18"

32-35

32-40

32-101

GUN ACCESSORIES

SPECIAL APPLICATIONS— Metal Caps & Nozzles

Special Applications: Metal Caps & Nozzles

- Fit 426-G01 standard Albion metal front cap
- Improves ability to reach difficult applications like applying sealant around circular structures (pipes, conduit, etc.)
- One piece formed construction with 1/2" bead diameter or three piece construction with 1/8" or 1/4" bead diameter
- Consider using a high thrust gun with extension nozzles

Double Bead Nozzle:

- Saves time and increases precision when installing pre-cured silicone tape profiles

Double Bead Nozzle

32-110

P/N:

32-109-5

32-110-5

32-111-5

32-115-5

Nozzle Opening:

1/4" dia x .5" center

1/4" x 1" center

1/4" dia x 1.5" center

1/4" dia x 2" center

Double Bead Cap

26-26

Double Bead Caps:

- Accepts Albion metal nozzles on 1 1/8" centers (p/n 26-26)

Narrow Joint Cap:

- For unique applications

P/N Bead Size Description

32-16- 3 1/8" x 1 1/2" 2" Clip Cap

32-16- 5 1/8" x 1 1/2" 2" Threaded

32-16-3

Self-Threading Nozzle:

(p/n 732-1)

- Cuts its own thread on plastic quart cartridge nozzles

732-1

Check Valve Nozzle:

- Dispenses small dab of sealant per activation (p/n 903-1)
- For sealing screw heads on metal roofing

Check Valve Nozzle

903-1

Precision Metering Metal Nozzle:

- Provides a precision ribbon bead
- Commonly used on lap joints or membrane roofing

Precision Metering

CARTRIDGES & NOZZLES

10oz Single Component Cartridges:

Features:

- Fits most standard 10oz (1/10 Gallon) Cartridge Guns
- General purpose applications
- High density polyethylene plastic
- When loading use Albion's "Caulking Loader" and Adaptor (p/n 343-H357)
- Standard Cartridge (p/n 453-1)
- Standard piston (p/n 454-1)
- Industrial Style Cartridge: Excellent selection of nozzles for precise, accurate applications (see page70)

Single Component Industrial Cartridges:

Features:

- Generally used for adhesive applications
- Unique cartridge design requiring cartridge specific tools
- Common in automatic, semi-automatic, and manually applied processes.
- Excellent selection of nozzles for precise, accurate applications. See Metal and Plastic Nozzles (page 70)
- When loading use Albion's Caulking Loader and 343-H361 Adaptor
- Includes piston and plug

P/N:	Cartridge Length:	Ounces:

Leather Pistons:

Standard Leather Piston Packing Replacements: recommended for general purpose applications. Improves dispensing performance. Flexible, long-lasting and durable. To customize your tools for specific types of adhesives and sealants see SYNTHETIC UPGRADES on page 79.

Application: Standard leather pistons for most applications.

- Toughest, easily handles harsh abrasives such as grout.
- Best all-around chemical resistance.

Required Maintenance:

- Leathers must be soaked in light weight oil between cleanings to retain their sealing properties.

P/N	Diameter	Load

GUN ACCESSORIES

GUN MODIFIERS

Piston Packing Replacements:

Synthetic Upgrades for Special Applications: Optimizes your piston assembly for various types of adhesives and sealants. Improves dispensing performance. Albion's twin single-cup system allows individual piston cup replacement. All Albion Bulk models come equipped with standard 21-1 Soft Leather Piston Cups for general purpose applications.

P/N	Diameter	Piston Cup Type	Load
21-16	2"	Nitrile Rubber	Bulk
Recommended for bulk applications with water based materials. Easy to clean. Good air-gun seal.			
21-20	2"	TEFLON®	Bulk/Sausage
Most chemically-resistant synthetic piston available. Higher in cost, easily damaged if abused. Universal piston for bulk and sausage applications.			
29-H25*	2"	Polyethylene	Sausage
Polyfinger design. Disposable sausage piston. Lower cost alternative. For best results replace after a few days work.			
21-30	2"	Poly Plastic	Bulk
Low cost bulk alternative. Food safe.			
21-24	2"	Hytre	Bulk/Sausage
Stiff piston, with sharp edge to scrape barrel walls clean. Good chemical resistance. Recommended for sausage applications.			
21-26	2"	Nylon	Bulk/Sausage
Same stiffness as Hytre, but with better chemical resistance. Recommended for bulk and sausage applications.			
873-6	2"	Plastic	Sausage
For B-Line and AT1200S Sausage guns			
873-35	2"	Hytre	Bulk
Bulk piston for B-Line Sausage guns

993-G04	846 Series
993-G05	405-15E
993-G13	DL-32 Series

GUN ACCESSORIES

BULK LOADING ACCESSORIES

Overview: Bulk Loading Accessories

Loading a bulk gun can be difficult and messy; the following items improve productivity and reduce mess

- 1. Loading Sleeve**— designed to keep the material off the outside of the barrel by sliding over the barrel when loading
- 2. Follow Plate**— designed to minimize the material's exposure to air and improve the loading process; specific technique or familiarity required to successfully use this accessory
- 3. Caulking Loader**— designed to mechanically load material in a tool both quickly and easily; loaders are designed to fit specific pails; read the information below before selecting the correct loader

- For 2 inch diameter models only; slips over and locks on to the gun barrel to keep end free of material

<u>P/N:</u>	<u>Description:</u>	<u>P/N:</u>	<u>Description:</u>
33-3	Clip Cap Barrel Guns	33-10	NEW! Flexible Sleeve

Straight & Tapered Pails, Follow Plates

Follow Plates:

- Designed to fit inside pail; more specific requirements below

Straight Metal Pails:

<u>P/N</u>	<u>Description</u>	<u>Pail- Inside Diameter</u>
117-12	2 Gallon for Threaded Barrel Gun	6 ⁷ / ₁₆ "
117-13	2 Gallon for Clip Cap Barrel Gun	6 ⁷ / ₁₆ "
117-14	2 Gallon for Threaded Barrel Gun	8 ³ / ₈ "
117-15	2 Gallon for Clip Cap Barrel Gun	8 ³ / ₈ "
117-16	5 Gallon for Threaded Barrel Gun	10 ⁷ / ₈ "
117-17	5 Gallon for Clip Cap Barrel Gun	10 ⁷ / ₈ "

Plastic or Steel Tapered or Straight Sided Pails: standard units consist of steel plates and Neoprene rubber seals

<u>P/N</u>	<u>Description</u>	<u>Pail- Inside Diameter</u>	
		<u>(Minimum)</u>	<u>(Maximum)</u>
504-G01	2 Gallon for Threaded Barrel Gun	7 ³ / ₄ "	9"
504-G02	2 Gallon for Clip Cap Barrel Gun	7 ³ / ₄ "	9"
504-G07	5 Gallon for Threaded Barrel Gun	9 ⁷ / ₈ "	11 ³ / ₈ "
504-G08	5 Gallon for Clip Cap Barrel Gun	9 ⁷ / ₈ "	11 ³ / ₈ "
504-G09	504-G01 w/Viton Seal	7 ³ / ₄ "	9"
504-G10	504-G02 w/Viton Seal	7 ³ / ₄ "	9"
504-G11	504-G07 w/Viton Seal	9 ⁷ / ₈ "	11 ³ / ₈ "
504-G12	504-G08 w/Viton Seal	9 ⁷ / ₈ "	11 ³ / ₈ "
504-G13	20 Liter, Threaded	10"	12"

(pressure [psi] is what moves material out of the nozzle; higher number = higher pressure)

GUN ACCESSORIES

BULK LOADING ACCESSORIES

Caulking Loaders:

- Quick clean method of filling bulk guns and cartridges
- Designed to fit specific pails depending on the pail size and a standard 2-inch diameter threaded barrel gun
- Adaptors available to fit all Albion model dispensing tools/cartridges

Pump Style — Standard Unit:

P/N	Description	Pail- Inside Diameter	
		(Minimum)	(Maximum)
344-7	2 Gallon Pail	7 ³ / ₄ "	9"
344-4	5 Gallon Pail — Straight Side Metal or Plastic Pail	11 ⁵ / ₁₆ "	
344-4TP	5 Gallon Pail — Metal Tapered Pail	10 ³ / ₄ "	11 ⁵ / ₁₆ "
344-4PL	5 Gallon Pail — Plastic Tapered Pail	9 ³ / ₄ "	11 ⁵ / ₁₆ "

Screw Style — Standard Unit:

P/N	Description	Pail- Inside Diameter	
		(Minimum)	(Maximum)
344-6	5 Gallon Pail — Straight Side Metal or Plastic Pail	11 ⁵ / ₁₆ "	
344-6TP	5 Gallon Pail — Metal Tapered Pail	10 ³ / ₄ "	11 ⁵ / ₁₆ "
344-6PL	5 gallon pail — Plastic Tapered Pail	9 ³ / ₄ "	11 ⁵ / ₁₆ "

Note: improved chemical-resistant Viton rubber seals are available; add (-V) to the part number; i.e. 344-7-V

Caulking Loader Adapters:

- Fastens to all Albion Caulking Loaders
- Allows loader to work with different gun styles and to be used to fill cartridges

Gun Styles:

P/N	Description
343-H353	2" Clip Cap Barrel Guns
228-G03	2 ⁵ / ₈ " Diameter Barrel Guns (770 Series Guns)
228-G04	3 ³ / ₈ " Diameter Barrel Guns (103 & 200 Series Guns)

Cartridge Styles:

P/N	Description
343-H351	2 ¹ / ₂ " Diameter — (Quart)
343-H349	2" Diameter
343-H357	1 ⁷ / ₈ " Diameter — 1/10 Gallon and 300ml Two Component
343-H361	1 ⁵ / ₈ " Diameter
228-G06	75ml Two Component
228-G07	150ml Two Component
228-G10	750ml Two Component
343-H445	Piston Stabilizer

GUN ACCESSORIES

BULK LOADING ACCESSORIES— Mixers, Cleaning & Joint Tools

Mixers:

Catalyst Mixer:

- Popular because of its smooth, easy mixing action
- Excellent for color pack or two component urethane applications
- Mixer fits 1/2" drill chuck

P/N	Description	Blade	Shaft Length
381-G01	5 Gallon Pail	6"	18"
381-G02	2 Gallon Pail	4"	18"
381-G03	Stand Up 5 Gallon Pail	6"	28"
381-G04	Stand Up 2 Gallon Pail	4"	28"

Mixing Paddle:

- Fast blending of low viscosity materials; fits 1/4" drill chuck

P/N	Description	Shaft Length
162-G02	One Gallon Pail Mixer	8"
162-G03	5 Gallon Pail Mixer	18"

Prop Mixer:

- Stainless Steel twin propeller mixer for low viscosity materials
- Outer ring shell prevents container punctures; fits 1/4" drill chuck

P/N	Description	Blade	Shaft Length
230-HS	1-2 Gallon Pail Mixer	2 1/2"	15"
230-PS	5 Gallon Pail Mixer	5"	21"

Bulk Barrel Brush:

- Brass bristle brush used to clean inside of 2" diameter PLATED STEEL barrels

P/N	Description
800-G01	Curved Handle for Manual Cleaning
800-G02	Straight Shank for Use with Drill
800-H01	Head Replacement

- Not recommended for use on Teflon® coated barrels.

GUN ACCESSORIES

CAULKING ACCESSORIES— Joint Tools

Joint Tools:

1058-Series Plastic C.A.T.

922-Series Stainless C.A.T.

C.A.T. Spatulas:

- Elliptical Spline Radius Tip
- Easily creates specific hourglass sealant cross-section
- Available in 1058-Plastic or 922-Stainless Steel
- Plastic includes both passive and aggressive tips shapes

Invented by Wayne BelCher, United Professional Caulking & Restoration, Inc.

Plastic C.A.T. Spatulas:

- Chemical resistant, non-marking, 8³/₄" long

<u>P/N</u>	<u>Description</u>	<u>Width</u>
1058-G01	8-piece plastic C.A.T. set	
1058-G02	4-piece plastic C.A.T. set - smaller sizes	
1058-G03	4-piece plastic C.A.T. set - larger sizes	
1058-125P	Plastic - Passive Tip #10	1 ¹ / ₄ "
1058-150P	Plastic - Passive Tip #20	1 ¹ / ₂ "
1058-100A	Plastic - Aggressive Tip #30	1
1058-100P	Plastic - Passive Tip #40	1
1058-75A	Plastic - Aggressive Tip #50	3 ¹ / ₄ "
1058-087P	Plastic - Passive Tip #60	7 ¹ / ₈ "
1058-087A	Plastic - Aggressive Tip #70	7 ¹ / ₈ "
1058-075P	Plastic - Passive Tip #80	3 ¹ / ₄ "

Stainless Steel C.A.T. Spatulas:

- Curved steel handle, ground and tapered

<u>P/N</u>	<u>Description</u>	<u>Width</u>
922-G01	6-piece Stainless Steel set	
922-3S	Stainless Blade 3" long	7 ¹ / ₈ "
922-4S	Stainless Blade 4" long	3 ¹ / ₄ "
922-5S	Stainless Blade 5" long	7 ¹ / ₈ "
922-6S	Stainless Blade 4" long	1"
922-8S	Stainless Blade 4 ¹ / ₄ " long	1 ¹ / ₄ "
922-10S	Stainless Blade 4 ⁵ / ₈ " long	1 ¹ / ₂ "

GUN ACCESSORIES

Caulking ACCESSORIES— Joint Tools

Joint Tools:

Mini-Joint Tooling Kit: (p/n 556-G01)

- Three hard plastic doubled-ended tools providing the following widths: 1/8", 1/4", 5/16", 3/8", 7/16", 1/2"

Tooling Joints:

- Ensure good adhesion to substrates; Albion joint tools also offer:
- Proper flexibility for perfect finished joints
- Easy solvent clean-up (no plastic components)
- Premium grade stainless steel
- Rounded tips for standard applications
- Easy to modify for unique applications

Classic Spatulas:

- The original hardwood handled classic spatula well known to professionals

P/N	Description	Width
258-3TPS	3" Long Tapered Blade	Tapers from 5/8" to 3/8"
258-3S	3" Long Straight Blade	5/8"
258-4S	4" Long Straight Blade	3/4"
258-4TPS	4" Long Tapered Blade	7/16"
258-5S	5" Long Straight Blade	13/16"
258-5TPS	5" Long Tapered Blade	1/2"
258-6S	6" Long Straight Blade	1"
258-8S	8" Long Straight Blade	1 1/4"
258-10S	10" Long Straight Blade	1 1/2"

Streamline Spatulas:

- Curved steel handle; same blade specifications as 258 Series

P/N	Description	Width
958-G01	Streamline Spatula Set; 7 Piece Bevelled Handle Standard Spatulas	
958-3TPS	3" Long Tapered Blade	Tapers from 5/8" to 3/8"
958-3S	3" Long Straight Blade	5/8"
958-4S	4" Long Straight Blade	3/4"
958-5S	5" Long Straight Blade	13/16"
958-6S	6" Long Straight Blade	1"
958-8S	8" Long Straight Blade	1 1/4"
958-10S	10" Long Straight Blade	1 1/2"

GUN ACCESSORIES

BULK LOADING ACCESSORIES— Mixers, Cleaning & Joint Tools

Joint Tools:

Scraping Tools:

- Rigid stainless steel construction with offset hardwood handle
- Ground knife edge designed to scrape excess material off substrates
- Excellent for saw or flush joints where material overflows the joint
- Excellent for scraping material off container sidewalls

P/N	Blade Measurement
258-33715	2" Wide x 5" Long
258-33719	2 1/2" Wide x 8" Long
258-33718	2" Wide x 8" Long

Caulk Knife:

- Used to remove old caulk and to clean joints
- All steel construction provides additional durability when sliding over rough, stony, or concrete surfaces
- Padded foam grip for comfort
- Holds standard utility blade (blade not included)

P/N	Length	P/N	Length
816-G01	12"	816-G03	24"
816-G02	18"		

Backer Rod Insertion Tools:

- Fully adjustable and places the Backer Rod at any desired depth

P/N	Description
640-5	Standard Model: includes 4 insertion wheels and 1 tamping blade for 1/8", 1/4", 3/8", 1/2" wide joints
640-6	Corner Model: designed for packing joints in a corner; includes 1/8", 1/4", 3/8", 1/2" wide insertion wheels
640-3 (set)	Includes both Standard & Corner Models
640-4	Road Model: similar to 640-5, except handle is reinforced with resin and tamping blade is omitted so attachment port can be used to accept a threaded standard broom handle
640-G20	4 1/2" Wheel Accessory: for 1/4" wide saw cut joints up to 2" deep

Wheel Accessories:

Joint Widths	Use with 640-3	Use with 640-4 & 5
1/8"	640-G06	640-G02
1/4"	640-G07	640-G03
3/8"	640-G08	640-G04
1/2"	640-G09	640-G05

GUN ACCESSORIES

BULK LOADING ACCESSORIES— Joint Tools & Heat Chest

Hot Pot™

Hot Pot™

Change the caulking conditions anytime; sustains sealants, coatings, and adhesives at usable temperatures, even in the coldest conditions (p/n 939-1)

- Heavy gauge steel pail with lid
- 15" high x 18" wide interior
- 120 VAC plug-in
- Ability to hold a case of 10oz cartridges, 20oz sausages, two 2-gallon pails or one 5 gallon pail
- Warms material to optimal temperature in 20 minutes
- Easy maintenance with repair parts
(*heat chest kit (p/n 174-G03) contains all interior parts - no enclosure*)

*Albion would like to credit the contributions made by Philip Porter of the Masonry Preservation Group

Special Tools

Delamination Detection Tool (DDT): (p/n 875-1)

Dramatically increase your speed and accuracy in detecting invisible delamination, voids, and hollows below the surface of concrete compared with tapping with hammers or dragging chains; use for inspecting concrete slabs, parking garages, bridge decks, balconies and tunnels

<u>P/N</u>	<u>Description</u>
875-1	Delamination Detection Tool
876-1	4' - 8' Telescopic Pole for DDT
876-2	6' - 12' Telescopic Pole for DDT

Heavy Duty Contractor Tool Bag: (p/n 968-1)

Keep all your caulking tools together in one place; features include:

- Professional quality
- Heavy duty nylon
- Double handles, zippered top, shoulder strap
- 29 pockets
- 30" x 10" x 10"
- Large enough to comfortably hold several of our largest bulk guns, including cordless guns
- Convenient pockets on inside and outside to keep spare nozzles, caps, spatulas and other accessories within easy reach
- Stay open top makes it easy to add and remove tools

GUN ACCESSORIES

18V CORDLESS GUN ACCESSORIES— Batteries, Chargers & Kits

Powered by Milwaukee® RED LITHIUM™ Battery Technology

Lithium-ion Battery Pack

Lithium-ion Battery Charger

Cordless Powered

Compact 18v Lithium-ion Battery Pack: (p/n 982-2)

- 1.5 amp hour capacity
- Recharge time 30 minutes
- Equivalent run time with 40% less weight than an 18V NiCad battery
- Individual Cell Voltage Monitoring-ensures optimal charge and discharge for maximum life
- Battery Fuel Gauge - Displays remaining run-time

High Capacity 18v Lithium-ion Battery Pack: (p/n 982-5)

- 2.8 amp hour capacity
- Recharge time 60 minutes

Charger for 18v Lithium-ion Batteries: (p/n 982-3)

- Recharges compact battery in 30 minutes
- 110V AC. Euro and Australian versions available.

18V Lithium-ion Cordless Conversion Kits:

convert 18V Albion Lithium-ion gun to any other model

- 995-1 Conversion Kit to 846-1E
- 995-2 Conversion Kit to 405-15E
- 995-3 Conversion Kit to DL-45-T13E
- 995-4 Conversion Kit to DL-59-T13E
- 995-5 Conversion Kit to 770-20E
- 995-6 Conversion Kit to 103-15E
- 995-9 Conversion Kit to DL-45-T20E

Standard Replacement Pull

Pulls

Pulls:

- 145-G15 Standard Li-Io Cordless Pull
- 310-1 Ladder Hook Pull
- 870-2 Cartridge ejector for Cordless

GUN ACCESSORIES

12V CORDLESS GUN ACCESSORIES - Battery, Charger

Powered by Milwaukee® RED LITHIUM™ Battery Technology

12V Lithium-ion Battery Pack

12V Lithium-ion Battery Charger

12V Cordless Powered

Compact 12V Lithium-ion Battery Pack: (p/n 1004-3)

- For use with 12V gun models E12, E12Q and E12S20
- 1.5 amp hours of runtime
- 30 minute recharge
- Delivers fade-free power in extreme jobsite conditions

12 volt
Li-Io

Charger for 12V Lithium-ion Batteries: (p/n 1004-4)

- Recharges compact battery in 30 minutes
- 110V AC.

Albion ENGINEERING Tidbit™

Albion offers two battery-powered cordless drives:

12Volt and 18Volt. Both are powered by lightweight, long-lasting, fast-recharging Lithium-ion batteries. The rod speed (not under load) for both models is 21 to 23 inches per minute.

- Heavy Duty drive pushes with 950 lbs. of force
- Over 80 gun models for Bulk, Sausage, Cartridge and Multi-Component dispensing
- Best for thick materials & twin-cartridges

- Standard Duty drive pushes with 400 lbs. of force
- 3 gun models for 20oz. Sausages, 10oz. Cartridges & Quart Cartridges
- 30% lighter than comparable 18V models
- Best for standard materials like acrylic, silicone & urethane

What's New in **Version 4 of Catalog 333**

Introduction

- Expanded Table of Contents to help locate products faster - pg. 3
- Details on new 12V Lithium-ion cordless Drive - pg. 14

Bulk Guns

- Improved page headings to help locate guns faster
- More details on gun features, especially 18V cordless

Sausage Guns

- New lightweight cordless 12V gun p/n E12S20 - pg. 34

Cartridge Guns

- New lightweight 10oz. cordless 12V gun p/n E12 - pg. 38
- New lightweight Quart cordless 12V gun p/n E12Q - pg. 42
- More details on features of B-Line guns

Multi-Compartment Guns

- Improved page headings to help locate guns faster
- New E18 Twin Cartridge cordless guns:
 - ▶ 200ml 1:1 & 2:1 ratio guns - pg. 51
 - ▶ 400ml 1:1, 2:1, 4:1 & 10:1 ratio guns - pg. 51
 - ▶ 600ml 1:1 & 2:1 ratio guns - pg. 57
 - ▶ 600ml 1:1 & 2:1 ratio EXTENSION guns - pg. 59
 - ▶ 1500ml 1:1 ratio EXTENSION guns - pg. 64
 - ▶ 380ml 10:1 ratio COAXIAL Cartridge guns - pg. 65
- New AT Air Twin Cartridge gun:
 - ▶ 1500ml 1:1 ratio SIDE-LOAD gun - pg. 63
- New B26 High Thrust Manual Drive Twin Cartridge guns:
 - ▶ 380ml 4:1 & 10:1 ratio COAXIAL Cartridge guns - pg. 65
 - ▶ 1500ml 1:1 ratio SIDE-LOAD gun - pg. 64

Accessories

- New plastic Ribbon Bead Nozzle 1/8" x 4" p/n 1018-G01 - pg. 70
- Expanded listing of replacement Pistons - pg. 79
- Improved listing of replacement Rod Pulls - pg. 80
- New Flexible Bulk Loading Sleeve p/n 33-10 - pg. 81
- New CAT Plastic Spatulas p/n 1058-G01 - pg. 84
- New CAT Stainless Steel Spatulas p/n 922-G01 - pg. 84
